

Motorcycle Engine Connecting Rod

Connecting rod and associated components for motorcycle engines are available. The connecting rod includes the wrist pin bearing and other small parts.

Product Overview

High-Performance Engine Component

This motorcycle engine connecting rod is engineered for precision and durability within high-performance engine systems. The kit includes the main connecting rod along with essential associated components such as the wrist pin bearing and other critical small parts. Designed to meet rigorous mechanical standards, this assembly ensures smooth power transmission and reliable engine operation.

Technical Details

Component Type

Engine Internal • Connecting Rod Assembly

Model Identifier

AM-CR-004

In the Box

Included Components

- Connecting Rod
- Wrist Pin Bearing
- Associated Small Parts
