

Motorcycle Engine Connecting Rod Assembly

This connecting rod assembly is designed for motorcycle engines. It includes the connecting rod, piston pin, needle bearing, and small end bearing for high-performance and improved durability.

Product Overview

High-Performance Connecting Rod Assembly

This precision-engineered connecting rod assembly is designed for motorcycle engines, specifically optimized for high-performance applications. The kit includes the connecting rod, piston pin, needle bearing, and small end bearing to ensure a complete and reliable installation. Built for durability and optimal fit, this component is commonly utilized in two-stroke engine systems.

Technical Specifications

Engine Type

Two-stroke

Included Components

- Connecting rod
- Piston pin
- Needle bearing
- Small end bearing

Model Number

AM-CR-010

Application Focus

High-performance, Engine repair, Precision-engineered
