

# Motorcycle Engine Cylinder

This motorcycle engine cylinder is designed for optimal engine performance and durability. Its precision-engineered cooling fins ensure efficient heat dissipation and consistent operating temperatures.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance Motorcycle Cylinder

This high-performance motorcycle cylinder is precision-engineered to deliver optimal engine performance and long-lasting durability. It features advanced cooling fins designed for efficient heat dissipation, which ensures that the engine maintains consistent operating temperatures even under demanding conditions. Constructed from high-quality materials, this component is built to enhance overall engine power and efficiency across a wide range of motorcycle models.

## Engine Specifications

<b>Bore Diameter Range</b>	39 mm
<b>Maximum Bore Diameter</b>	61.7 mm

## Compatibility

### Supported Engine Models

Model Name	Bore Diameter
ü50	39mm
ZX50	40mm
ZX65	44mm
ZX948	48mm
DIO50	39mm
DIO65	43mm
DIO948	48mm
LET'S50	41mm
LET'S65	44mm
TVS XL SUPER	46mm
ETERNO	57mm
PGT103A	46mm
PGT103B	46mm
3W4S	57mm
AN10B	61.7mm
MOBYLETTE	39mm
HDIII	55mm
XWJ	43mm

## Features

### Key Features

Precision Engineered, Heat Dissipation Fins, High Durability Material, Enhanced Power Output
