

Motorcycle Engine Gear

Precision-engineered for optimal power transmission, this motorcycle engine gear ensures durability. It is manufactured from high-strength alloy steel and features precisely cut teeth for smooth, efficient operation.

Overview

Precision-Engineered Motorcycle Engine Gear

This high-performance motorcycle engine gear is designed for optimal power transmission and long-lasting durability. Manufactured from high-strength alloy steel, the component features precisely cut teeth to ensure smooth and efficient operation. It undergoes specialized heat treatment to enhance wear resistance, ensuring reliable performance even in the most demanding engine environments.

Technical Specifications

Surface Treatment

Heat-treated

Material Composition

High-strength alloy steel

Application Suitability

Motorcycle Engines, Power Transmission

Part Identifier

1A
