Product Overview

High-Precision Engine Gear

This high-precision motorcycle engine gear is engineered for optimal performance and durability in demanding engine environments. Featuring precisely machined teeth and robust construction, it ensures smooth power transmission and enhanced stability through an integrated central bearing. Designed to meet or exceed OEM specifications, this component is an ideal solution for engine rebuilds and performance upgrades.

Technical Specifications

Key Design Features

- Precisely machined teeth for smooth transmission
- Robust construction for durability
- Integrated central bearing for stability
- Internal splines for secure shaft engagement

Part Numbers

V1224-0-50721A, 57-58-0-50721A

Performance & Compatibility

Performance Highlights

1 Standard

OEM Compatibility

Primary Application

Engine Rebuild • Performance Upgrade
