

Motorcycle Engine Side Cover

This aluminum motorcycle engine side cover protects the engine's internal components. It features a circular mounting flange with bolt holes for secure attachment.

Product Overview

Engine Protection and Performance

This motorcycle engine side cover is precision-engineered to provide robust protection for critical internal components, such as the clutch or stator housing. Crafted from durable, die-cast aluminum, it features a smooth silver finish that resists debris while maintaining structural integrity. Its design includes a circular mounting flange with multiple bolt holes, ensuring a secure and reliable fit for demanding motorcycle applications.

Technical Specifications

Mounting Configuration

- Circular mounting flange
- Multiple bolt hole pattern
- Central opening

Material	Die-cast Aluminum
Surface Finish	Smooth Silver Coating
Component Type	Clutch Housing, Stator Housing, Engine Cover
