

Motorcycle Engine Side Cover

Aluminum motorcycle engine side cover designed for scooters and small displacement motorcycles. It features a circular central housing, likely for the stator or alternator, and includes mounting points for attachment to the engine case.

Product Overview

High-Quality Engine Side Cover

This motorcycle engine side cover is engineered for durability and precise fitment, making it an essential component for engine maintenance and repair. Constructed from high-grade die-cast aluminum, it offers excellent heat dissipation and structural integrity for small displacement motorcycles and scooters. The part features a machined finish on critical surfaces and includes integrated mounting points for a secure, reliable attachment to the engine case.

Technical Specifications

Material	Die-cast Aluminum
Finish	Machined
Key Features	Stator Housing, Alternator Protection, Integrated Mounting Points

Compatibility

Application Type

Scooters • Small Displacement Motorcycles
