

Motorcycle Engine Spark Plug

This spark plug features a nickel-plated housing that prevents oxidation and corrosion. Its inner sealing with conductive glass ensures fine conductivity and sealing.

Product Overview

High-Performance Motorcycle Spark Plug

This high-performance spark plug is engineered to provide reliable ignition and optimal combustion efficiency for motorcycle engines. Featuring a durable nickel-plated housing and a 95% pure alumina insulator, it offers excellent resistance to corrosion and electrical flashover. The inclusion of a copper core electrode ensures superior heat dissipation, helping to prevent engine overheating and extending the overall service life of the component.

Technical Construction

Insulator Material	95% Pure Alumina
Housing Finish	Nickel Plated
Electrode Core Material	Copper

Performance Features

Sealing Technology

- Conductive glass inner sealing
- Multi-layer elastic gaskets
- Heat crimping process

Key Features	Corrosion Resistant, Gas-Tight Fit, Heat Dissipation, Flashover Protection
--------------	--

Compatibility

Model Identifiers

A7TC • 7TC
