

Motorcycle Engine Spark Plug

This spark plug is engineered for optimal ignition and combustion efficiency in motorcycle engines. Its durable construction, precise electrode gap, and reliable sealing ensure consistent performance and a long lifespan.

Product Overview

High-Performance Ignition

This high-performance spark plug is engineered to provide optimal ignition and combustion efficiency for motorcycle engines. Built for durability, it features a precise electrode gap and reliable sealing technology. It is designed to ensure consistent performance and an extended service lifespan, making it an ideal choice for various motorcycle applications requiring a D8RTC type plug.

Technical Details

Model Specification

D8RTC

Key Features

High-performance, Durable construction, Precise electrode gap, Reliable sealing
