Product Overview

High-Performance Ignition Solutions

These motorcycle engine spark plugs are engineered to provide reliable ignition and consistent engine performance under various operating conditions. Designed with durable construction, they ensure efficient combustion, potentially improving fuel economy and reducing emissions. The range includes multiple models compatible with industry-standard specifications, offering a versatile solution for engine maintenance and repair.

Compatibility & Standards

Cross-Reference Compatibility

NGK Compatible, DENSO Compatible, CHAMPION Compatible, BOSCH Compatible

Product Specifications

Available Models

- BM6A
- A7TC
- D8TC
- E6T
- 7SP

Construction Features

Ceramic Insulator • Metal Casing • Threaded Terminal • High-Temperature Resistant
