Product Overview

High-Performance Starting Disk

This motorcycle starting disk is engineered for reliable engine initiation across a wide range of motorcycle series. Constructed from robust iron, the component features a precise gear design to withstand the high stresses of repeated starting cycles while ensuring efficient power transmission. Designed for seamless integration, it provides an optimal fit to enhance the starting performance of your motorcycle engine.

Technical Specifications

Compatible Series

- CG-125/150/200/250
- C-70/90/110
- WY-125/150
- GN/EN/BAJAJ SERIES

Material

Iron

Logistics

Port of Loading

FOB Guangzhou/Huangpu Port

Packaging Type

Brand Paper Box, Brand Steel Box
