

Motorcycle Engine Timing Sprocket

This timing sprocket ensures accurate valve timing in motorcycle engines. It is made from high-strength materials for durability and smooth power delivery.

Product Overview

Precision Engine Timing Component

This high-performance motorcycle engine timing sprocket is engineered to meet national standards, ensuring reliable and accurate valve timing for optimal engine performance. Crafted from 45# stainless steel using advanced CAD and CAM processes, it offers exceptional durability and a long service life. Its high-abrasion resistance and rust-proof properties make it a reliable choice for demanding motorcycle engine environments.

Technical Specifications

Material	45# Stainless Steel
Hardness	58 HRC
Design Methodology	CAD, CAM

Performance Features

Key Benefits

- High abrasion resistance
- Rust-proof finish
- Precision-machined teeth
- Long-lasting working life

Certifications & Quality

National Standard • Quality Guaranteed
