

Motorcycle Exhaust Baffle

This motorcycle part is designed for use in the exhaust system. It features a cylindrical design with a vented end cap and mounting points for secure attachment.

Product Overview

Performance Exhaust Component

This motorcycle exhaust baffle is engineered for durability and performance, featuring a robust cylindrical design suitable for various exhaust system applications. Constructed from high-quality cast metal, likely aluminum or steel, it is built to withstand significant heat and vibration. The unit includes a vented end cap and secure mounting points, ensuring reliable attachment to the motorcycle frame for consistent operation.

Technical Specifications

Category

Motorcycle Parts • Exhaust System

Construction Material

Cast Metal (Aluminum/Steel)

Design Features

Vented End Cap, Cylindrical Body, Heat Resistant, Vibration Resistant

Mounting System

Integrated Frame Mounting Points
