Product Overview

High-Performance Exhaust System

This high-performance under-muffler exhaust system is engineered to optimize exhaust flow, effectively enhancing both engine horsepower and torque. Constructed from durable, corrosion-resistant stainless steel, it is built for longevity and consistent performance. The comprehensive kit includes the exhaust pipe, muffler, and all necessary mounting hardware, making it an ideal choice for custom motorcycle builds or as a performance-oriented replacement for stock systems.

Technical Specifications

Material	Stainless Steel
Model Type	MK Under Muffler (Monkey Type)
Part Number	0109-MF-27-00-00

Kit Components

Included Components

- Exhaust pipe
- Muffler
- Elbow pipe
- Mounting bracket
- Springs
- Rubber seal

Features

Key Benefits

Corrosion Resistant • Enhanced Exhaust Flow • Improved Performance • Sporty Exhaust Note
