

Motorcycle Fairing Component

This is a molded plastic motorcycle fairing component. It features a smooth finish, mounting holes, and recessed areas.

Product Overview

Precision-Engineered Fairing Component

This motorcycle fairing component is a high-quality, molded plastic part designed to integrate seamlessly with specific motorcycle models. Featuring a complex, bifurcated design with integrated mounting points, it offers both aesthetic enhancement and functional protection. Its smooth finish and durable construction ensure resistance to the elements while maintaining a sleek, professional appearance.

Technical Details

Color

Gray

Material

Durable Molded Plastic

Surface Finish

Smooth

Design Features

Bifurcated Design, Complex Curvature, Pre-drilled Mounting Holes

Component Type

Fairing / Fender
