

Motorcycle Fender with Clear Coat and UV Protection

This motorcycle fender utilizes autoclave technology, making it strong and flexible. The surface has a clear coat finish and UV protection for a non-fading, hi-gloss look; matte finishes are also available.

Product Overview

High-Performance Motorcycle Fender

This premium motorcycle fender is engineered using advanced autoclave technology, resulting in a part that is both stronger and more flexible than standard alternatives. The surface is meticulously finished with a clear coat and UV protection to ensure a non-fading, high-gloss appearance that withstands the elements. Designed for durability and aesthetic appeal, this component offers reliable protection against road debris while maintaining its finish over time.
