

Motorcycle Frame

This motorcycle frame is constructed from welded steel tubing. It provides structural support and mounting points for the engine, suspension, and bodywork.

Product Overview

Professional Grade Motorcycle Frame

This motorcycle frame is engineered as a robust structural foundation, designed to provide reliable support and precise mounting points for essential components including the engine, suspension systems, and bodywork. Constructed from high-quality welded steel tubing, the frame offers a rigid design optimized for durability and stability. It features integrated brackets and mounting tabs, ensuring seamless compatibility and efficient assembly for professional motorcycle builds or restoration projects.

Technical Specifications

Compatible Components

- Engine
- Suspension
- Bodywork

Material	Welded Steel Tubing
Frame Design	Rigid
Key Features	Welded Construction, Integrated Mounting Points, High Rigidity, Structural Support
