

Motorcycle Frame

This motorcycle frame is constructed from high-strength steel tubing for optimal rigidity and durability. It features mounting points for the engine, suspension components, and bodywork, with a black finish for corrosion resistance.

Product Overview

High-Performance Motorcycle Frame

This motorcycle frame is expertly crafted from high-strength steel tubing, engineered to provide the optimal balance of rigidity and durability required for demanding riding conditions. It features precision-engineered mounting points for engine, suspension, and bodywork components, ensuring seamless integration and performance. Finished with a durable black coating, this frame offers excellent corrosion resistance and long-term reliability for specific motorcycle models.

Technical Specifications

Surface Finish

Black Finish • Corrosion Resistant

Key Design Features

- Integrated engine mounting points
- Suspension component mounts
- Bodywork mounting points
- Optimized for rigidity

Material Construction

High-strength steel tubing
