

Motorcycle Frame for Custom Builds

This motorcycle frame is constructed from tubular steel, offering a robust foundation for custom builds. It features a rigid design without suspension, plus mounting points for the engine, fuel tank, and seat.

Product Overview

Custom Motorcycle Frame

This motorcycle frame is designed specifically for custom builds and restoration projects, providing a robust foundation for unique vehicle assembly. Constructed from high-quality tubular steel, the frame features a rigid design that ensures structural integrity and stability. It comes pre-equipped with essential mounting points for critical components, including the engine, fuel tank, and seat, streamlining the customization process.
