

Motorcycle Front Brake Hub Assembly with Lever

Motorcycle front brake hub assembly designed for AX100 model motorcycles. It features a metallic construction and lever mechanism for brake engagement, suitable for replacements or custom builds.

Product Overview

High-Performance Front Brake Hub Assembly

This front brake hub assembly is engineered specifically for AX100 model motorcycles, offering a reliable solution for brake system maintenance or custom builds. Constructed from durable metallic materials, it ensures consistent performance and longevity under standard operating conditions. The integrated lever mechanism provides smooth and responsive brake engagement, making it an essential component for maintaining safety and control.

Compatibility & Usage

Compatible Model	AX100
Application	Replacement Part, Custom Build

Technical Details

Key Components

- Brake Hub
- Lever Mechanism
- Brake Lining

Material Construction	Durable Metallic
