

# Motorcycle Front Fork Shock Absorber Pair

Pair of motorcycle front fork shock absorbers employing hydraulic telescopic action. These forks consist of an aluminum alloy outer tube and a steel inner tube with hard chrome plating.

## Product Overview

### Professional Grade Front Suspension

These hydraulic telescopic front fork shock absorbers are engineered for optimal damping and suspension performance in motorcycles. Constructed with a high-strength aluminum alloy slider and a hard chrome plated steel stanchion, these components ensure long-lasting durability under varied riding conditions. The design features precision oil seals to maintain hydraulic integrity and prevent fluid leakage.

## Technical Construction

Outer Tube Material	Aluminum alloy
Inner Tube Material	Steel (Hard chrome plated)
Key Features	Hydraulic Damping, Telescopic Design, Precision Oil Seals, Hard Chrome Plated Finish

## Mechanical Specs

Suspension Type	Telescopic Fork
Mounting Points	Frame-integrated mounting points
