

Motorcycle Front Shock Absorber

This front shock absorber is designed for 125 motorcycle models. It provides superior damping and control for a smooth and stable ride.

Product Overview

High-Performance Damping Solution

This front shock absorber is precision-engineered for CD152 models, delivering superior damping and control for a consistently smooth and stable ride. Constructed from durable, high-quality materials, it features a robust piston rod and advanced seals to ensure long-lasting reliability. Designed to enhance vehicle handling and comfort, this unit is an ideal replacement for worn original equipment and performs exceptionally well across various road conditions.

Technical Details

Key Features

- Robust piston rod construction
- High-quality sealing system
- Optimized damping characteristics
- Enhanced handling and stability

Compatible Model

CD152
