

Motorcycle Front Shock Absorber

This motorcycle front shock absorber enhances vehicle stability and ride comfort. Its robust design ensures consistent performance and improved handling.

Overview

High-Performance Stability

This high-performance front shock absorber is engineered to deliver enhanced vehicle stability and superior ride comfort. Designed to withstand demanding road conditions, it provides consistent performance and reliable handling for the duration of its service life. It serves as an ideal replacement for worn or damaged original equipment, ensuring improved control and safety.

Compatibility & Fitment

Compatible Models

CD318B

Technical Features

Key Features

- Optimized damping characteristics
- Durable construction
- Robust design for long-lasting performance
- Engineered for precise fit

Primary Application

Motorcycle Front Suspension
