

Motorcycle Front Shock Absorber for CD170

This front shock absorber is designed for CD170 motorcycles. It provides superior damping and control, enhancing ride comfort and stability.

Product Overview

High-Performance Damping for CD170

This front shock absorber is precision-engineered specifically for CD170 motorcycles, offering a reliable solution for maintenance and performance upgrades. Designed to deliver superior damping and handling, it significantly enhances ride comfort and stability on various road conditions. Built with durable materials, this component is an ideal choice for replacing worn or damaged original equipment to restore factory-level performance.

Technical Specifications

Application

Front Suspension • Replacement Part

Compatibility

CD170 Motorcycle

Key Features

High-performance damping, Enhanced stability, Improved ride comfort, Durable construction, Precision-engineered
