

Motorcycle Fuel Tank

This red painted fuel tank is designed for motorcycles and small engines. It features a silver filler cap and mounting brackets.

Product Overview

High-Quality Fuel Storage

This metal fuel tank is engineered for durability and reliable fuel storage in automotive or small engine applications. Finished with a protective red paint coating, the tank is designed to withstand environmental factors while maintaining a professional appearance. The assembly includes a secure silver filler cap and integrated mounting brackets, ensuring straightforward installation and long-term stability for mechanical systems.
