

Motorcycle Gear and Shaft Assembly

This motorcycle part features a precision-engineered gear and shaft assembly. The component is essential for maintaining the performance and reliability of the motorcycle.

Product Overview

Precision-Engineered Component

This motorcycle gear and shaft assembly is a high-quality component designed for critical engine and transmission performance. Featuring precision-engineered toothing, it ensures reliable engagement within the motorcycle's drivetrain. Built from durable metal, this assembly is constructed to withstand the significant stresses and torques encountered during operation, ensuring long-term reliability for your vehicle.

Technical Specifications

Material

Durable Metal

Design Features

- Precision-engineered toothed gear
- Cylindrical shaft design
- High-torque resistance

Part Number

AM-IK-042

Primary Application

Motorcycle Transmission, Engine System
