Product Overview

High-Performance Gear Shift Levers

These motorcycle gear shift levers are engineered for reliability and precision, serving as essential components for maintaining smooth transmission control. Manufactured to meet strict quality control standards, these parts offer original equipment quality performance suitable for various motorcycle models. Designed for durability, they ensure consistent shifting action for riders in diverse international markets.

Technical Specifications

Compatible Engine Sizes

- 125cc
- 150cc

Part Numbers

Model	Part Number
125cc	GRP0125260
150cc	GRP0150640

Quality Standards

ISO 9001:2000

Quantity per Package

1 pcs

Market Availability
