Product Overview

Versatile Handlebar Control Assembly

This motorcycle handlebar switch assembly provides a comprehensive control solution for essential electrical functions. Designed for durability with robust housing, it integrates critical operations including headlight modes, turn signals, and horn activation. Its universal compatibility with various popular motorcycle models makes it an ideal replacement or upgrade component for maintenance and repair.

Compatibility

Compatible Motorcycle Models

AX100, ECO100, CG125, GY6, AKT125, 110-2, BOXER100

Technical Features

Integrated Controls

- Headlight Control (Off/Parking/Low/High Beam)
- Turn Signals (Left/Right)
- Horn
- Engine Start/Stop
- Emergency Stop

Construction Materials

Durable Plastic • Metal Components

Installation

Wiring harness with multi-pin connector included for easy integration
