Product Overview

Enhanced Visibility and Design

This complete motorcycle headlight assembly is engineered to provide superior illumination for night riding. Featuring a multi-reflector design, it ensures optimal light distribution for both high and low beam functionality. The assembly includes a durable housing and integrated wiring harness, designed for straightforward installation and long-lasting performance in various riding conditions.

Technical Specifications

Construction Materials

- Polycarbonate lens
- Durable housing
- Black upper fairing
- Integrated wiring harness

Design Features

Multi-reflector design • Weather resistant • Ready-to-install

Beam Functions

Low Beam, High Beam

Compatibility & Aesthetics

Available Color Schemes

Component	Color Variants
Upper Fairing / Cowl	Black
Side Panels	Red / Orange
