

Motorcycle Headlight Assembly with Integrated Turn Signal

This motorcycle headlight assembly features an integrated turn signal. It provides enhanced visibility and safety for motorcycle riders.

Product Overview

Integrated Illumination Solution

This motorcycle headlight assembly features a comprehensive design that combines a powerful main headlight with an integrated turn signal indicator. Engineered for enhanced visibility and safety, the unit utilizes a complex reflector system for optimal light distribution. Its durable housing is constructed with a metallic finish, ensuring both aesthetic appeal and structural integrity for reliable performance on the road.

Technical Specifications

Design Features

- Integrated turn signal indicator
- Complex reflector design
- Separate auxiliary light compartment
- Metallic housing construction

Mounting System

Side-bracket mounting
