

Motorcycle Headlight Assembly with Projector and LED

This is a custom headlight assembly designed for motorcycles. It features multiple light sources, including a main projector beam, an auxiliary light, and an LED light strip.

Product Overview

Premium Motorcycle Headlight Assembly

This custom headlight assembly is engineered to significantly upgrade both the aesthetic appeal and safety performance of your motorcycle. Featuring a sophisticated combination of a main projector beam, auxiliary lighting, and an integrated LED strip, it ensures superior visibility in various riding conditions. The robust, dark-housing design offers a modern, angular look that integrates seamlessly with custom builds.
