

Motorcycle HID Headlight Lamp

This is a high-intensity discharge (HID) lamp for motorcycle headlights. It features a robust construction with a metal base and quartz glass bulbs to produce bright, focused light.

Product Overview

High-Intensity Motorcycle Lighting

This high-intensity discharge (HID) lamp is engineered specifically for motorcycle headlight applications, providing superior illumination compared to standard bulbs. Featuring a robust construction with a durable metal base and precision-crafted quartz glass bulbs, it is designed to withstand the rigors of road use. The internal structure utilizes a specialized gas mixture and electrodes to deliver a bright, focused light beam for enhanced visibility and safety.

Technical Specifications

Bulb Configuration

- Dual quartz glass bulbs
- Variable bulb sizes
- Integrated electrode system

Lamp Technology	HID (High-Intensity Discharge)
Materials	Metal Base, Quartz Glass, Ceramic/Plastic Housing

Performance Metrics

Key Performance Indicators

1 HID

High-Intensity Output
