

Motorcycle Integrated Luggage Rack Frame

This motorcycle frame features an integrated luggage rack for cargo transport. The tubular steel frame is designed for scooter-style motorcycles and provides mounting points for various components.

Product Overview

Integrated Luggage Rack Frame

This motorcycle integrated luggage rack frame is engineered for scooter-style motorcycles, featuring a robust tubular steel construction. The design seamlessly incorporates a rear luggage rack into the subframe, providing a reliable platform for cargo transportation. With dedicated mounting points for front suspension and steering components, this frame serves as a critical structural component for maintenance or assembly projects.

Technical Specifications

Mounting Capabilities

- Front suspension mounting points
- Steering component mounting points
- Rear subframe luggage integration

Construction Material	Tubular Steel
Compatibility	Scooter-style motorcycles
Key Features	Integrated Luggage Rack, Tubular Steel Frame, Rear Subframe, Scooter Compatible
