

Motorcycle LED Headlight with Cooling Fins

This is a high-intensity LED headlight assembly designed for motorcycles. It features multiple LED emitters for enhanced visibility and a durable black housing with integrated heat dissipation fins.

Product Overview

High-Intensity Motorcycle Lighting

This high-intensity LED headlight assembly is designed specifically for motorcycle applications, providing enhanced visibility on the road. Featuring a durable black nylon housing, the unit includes integrated heat dissipation fins to manage thermal performance during extended use. The system comes complete with necessary mounting hardware and wiring, ensuring a straightforward installation process for professional upgrades.

Technical Specifications

LED Bead Count	6
Light Color	White

Construction & Design

Cooling System Integrated Heat Dissipation Fins	
Housing Material	Nylon
Housing Color	Black

Installation

Included Components

- Mounting Hardware
- Wiring Harness
