

Motorcycle Lithium-Ion Starter Battery

This lithium-ion starter battery is designed for motorcycles and other specialty vehicles. It features a 12.8V voltage and a cold cranking amperage (CCA) of 310A.

Overview

High-Performance Lithium-Ion Power

This advanced lithium-ion starter battery is engineered for motorcycles and specialty powersports vehicles, offering a significant upgrade over traditional lead-acid alternatives. With ultra-lightweight construction and superior cranking power, it ensures reliable engine starts even in demanding conditions. The battery features an exceptionally long cycle life and stable discharge voltage, making it a durable and efficient power solution for various automotive and outdoor applications.

Technical Specifications

Voltage	12.8 V
Cold Cranking Amps	310 A
Energy Capacity	64 Wh/Hr

Performance Metrics

Performance Highlights

2000 cycles

Cycle Life

30 C

Cranking Current

10 C

Charge Acceptance

Rapid Recharge Time

6 minutes

Features

Eco-Friendly Design

Acid-Free • Heavy-Metal Free • No Pollution

Self-Discharge Performance

Less than 1 year storage time

Applications

Compatible Applications

- Motorcycle starting
- Lighting and auxiliary power
- Lawn mowers
- Jet skis
- Snowmobiles
- Water craft
