

Motorcycle Magneto Coil

Motorcycle magneto coil designed for efficient energy generation and reliable performance. It includes a pickup coil and wiring harness with connectors for easy installation in motorcycle electrical systems.

Product Overview

High-Performance Magneto Coil

This motorcycle magneto coil is engineered for efficient energy generation and reliable ignition performance within motorcycle electrical systems. It features high-quality copper windings around a central metal core, providing consistent voltage output for dependable spark generation. Designed for durability, the unit is built to withstand high temperatures and vibrations, making it an ideal choice for replacement or system upgrades.

Technical Specifications

Coil Type	Magneto Coil
Pole Count	18 Poles
Compatibility	GL150 OEM

Design & Construction

Key Features	Copper Windings, High-Temperature Resistant, Vibration Resistant, Integrated Wiring Harness
Installation	Includes pickup coil and wiring harness with connectors for easy installation.
