

Motorcycle Rear Axle Assembly

This heavy-duty motorcycle rear axle assembly is designed for robust performance and durability. It features a central differential housing, axle shafts, and brake assemblies constructed from high-strength materials for reliable power transmission and braking.

Product Overview

Heavy-Duty Rear Axle Assembly

This motorcycle rear axle assembly is engineered for robust performance and long-term durability. It features an integrated design comprising a central differential housing, precision-machined axle shafts, and reliable brake assemblies. Constructed from high-strength materials, this component ensures efficient power transmission and consistent braking performance across various motorcycle applications.

Technical Specifications

Core Components

- Central differential housing
- Axle shafts
- Brake assemblies

Material Grade

High-Strength Steel • Heavy-Duty

Application Compatibility

Motorcycle, Power Transmission, Braking System
