

Motorcycle Rear Axle Assembly

Heavy-duty rear axle assembly designed for motorcycles, featuring robust construction and durable components for reliable performance. The assembly includes brake mechanisms, hubs, and a differential housing, ensuring efficient power transfer and smooth operation.

Product Overview

Heavy-Duty Rear Axle Assembly

This heavy-duty rear axle assembly is engineered for durability and reliable performance in motorcycle applications. Featuring a robust construction, the unit incorporates essential components including the brake mechanism, hub, and differential housing. It is designed to ensure efficient power transfer and smooth operation, making it an ideal choice for motorcycle repairs and performance upgrades.

Technical Specifications

Included Components

- Brake Mechanism
- Hub
- Differential Housing

Build Quality

Heavy-Duty • Durable Construction

Application

Motorcycle Repair, Motorcycle Upgrade
