

Motorcycle Rear Mudguard Fender

This motorcycle part functions as a rear mudguard or fender. It protects the motorcycle and rider from water and debris thrown up by the rear tire.

Product Overview

Durable Rear Protection

This rear mudguard fender is engineered to provide essential protection for both the motorcycle and the rider by shielding against water, mud, and road debris thrown up by the rear tire. Designed with a precise curved profile, it conforms perfectly to the tire shape to ensure optimal coverage. Its robust construction makes it a reliable replacement part for maintaining vehicle cleanliness and performance.

Technical Specifications

Compatible Model	JH125
