

Motorcycle Rear Shock Absorber

This rear shock absorber is designed for the GN125 motorcycle model. It features mounting holes with a diameter of $\text{Æ}12\text{mm}$ and a center distance of 306 ± 2.0 .

Product Overview

High-Performance Stability

These high-performance rear shock absorbers are meticulously engineered to provide superior vehicle stability and ride comfort. Designed for durability and longevity, the unit features a high-quality chrome finish that ensures excellent resistance against corrosion. It integrates a robust coil spring system, delivering optimal damping capabilities and reliable load support for a smoother driving experience.
