

Motorcycle Rear Shock Absorber

This motorcycle rear shock absorber is designed for enhanced vehicle stability and ride comfort. It has a mounting hole of ± 10 and a center distance of 328 ± 2.0 .

Product Overview

High-Performance Engineering

These rear shock absorbers are meticulously engineered to deliver superior vehicle stability and enhanced ride comfort. Designed for durability, the unit features a robust construction pairing a resilient spring with a high-quality damper for optimized vibration control. By minimizing body roll and improving overall handling, these components ensure a significantly smoother and safer driving experience across various vehicle models.

Core Features

Primary Benefits

- Enhanced vehicle stability
- Superior vibration control
- Improved handling performance
- Reduced body roll
- Long-lasting durability

Installation

Easy Installation • Direct Fit
