

Motorcycle Rear Shock Absorber 310mm

This motorcycle rear shock absorber has a 310mm center distance between mounting holes. It is designed with AE12r1m mounting holes.

Overview

High-Performance Rear Suspension

These 310mm rear shock absorbers are engineered to provide optimal vehicle stability and superior ride comfort. Featuring a durable construction with a high-quality chrome finish, they offer excellent resistance to corrosion for long-lasting performance. The integrated coil spring design ensures efficient damping and support, effectively minimizing road vibrations for a smoother, more controlled driving experience.

Technical Specifications

Mounting Length	310 mm
Surface Finish	Chrome
Spring Design	Coil Spring

Key Features

Product Benefits

- Enhanced vehicle stability
- Improved ride comfort
- High vibration damping
- Corrosion-resistant construction

Application Compatibility	Motorcycle, Replacement Part, Performance Upgrade
