

Motorcycle Rear Shock Absorber (328mm Center Distance)

This motorcycle rear shock absorber enhances vehicle stability and ride comfort. It has mounting holes of ± 12 and ± 10 , with a center distance of 328 ± 2.0 .

Product Overview

High-Performance Rear Suspension

This rear shock absorber is precision-engineered to provide enhanced vehicle stability and superior ride comfort. Featuring a robust cylinder and piston assembly, it delivers consistent damping characteristics that significantly improve handling and control. Built for longevity and reliability, this component is an ideal solution for professionals seeking high-performance suspension upgrades.

Technical Specifications

Design Components

- Robust cylinder assembly
- High-performance piston assembly

Center Distance	328 mm
Key Performance Attributes	Enhanced Stability, Improved Handling, Superior Damping, Durable Construction
