

Motorcycle Rear Shock Absorber 350mm

This motorcycle rear shock absorber is designed for optimal suspension and ride comfort. It features a coil spring for enhanced damping and durability.

Product Overview

High-Performance Rear Shock Absorber

This 350mm rear shock absorber is precision-engineered to provide optimal suspension performance and superior ride comfort. Built with a robust coil spring design, it ensures consistent damping and long-term durability under varying road conditions. It is an ideal solution for vehicle applications that demand reliable and heavy-duty shock absorption capabilities.

Technical Specifications

Key Performance Metrics

350 mm
Length

Mounting Length	350 mm
Damping Mechanism	Coil spring
Compatible Vehicles	Motorcycle, General Utility
