

Motorcycle Rear Shock Absorber

This rear shock absorber is designed for motorcycle suspension systems. It features mounting holes of $\text{Æ}10.1 \times 28$ and $\text{Æ}10.1 \times 34$ with a center distance of 323 ± 2.0 .

Product Overview

High-Performance Rear Suspension

This premium rear shock absorber is engineered to provide superior vehicle stability and ride comfort across various driving conditions. Utilizing an advanced coil-over spring design paired with a precision hydraulic damping system, it offers exceptional shock absorption and control. Built from high-durability materials, this component ensures long-lasting reliability for professional-grade automotive applications.

Technical Details

Damping System	Hydraulic
Design	Coil-over spring

Application

Industry Category	Automobile Accessories, Rack Systems, Suspension Components
