

Motorcycle Rear Shock Absorber

This motorcycle rear shock absorber has a $\text{Æ}10$ installing hole under its design. It is applicable to the 350SF model and features mounting holes of $\text{Æ}10$ with a center distance of 364 ± 2.0 .

Product Overview

High-Performance Rear Suspension

These high-performance rear shock absorbers are meticulously engineered to enhance vehicle stability and significantly improve ride comfort. Built with a durable construction featuring a robust spring and damper system, they ensure optimal performance across a wide variety of driving conditions. This component serves as an ideal solution for both direct replacements and performance upgrades, providing riders with superior handling and precise control.

Technical Specifications

Construction Features

- Robust spring system
- High-performance damper system
- Durable heavy-duty construction

Component Type	Rear Shock Absorber
Key Performance Benefits	Enhanced Stability, Improved Handling, Optimal Control, Ride Comfort
