

Motorcycle Recovery Winch System

This winch system is designed for motorcycle or ATV recovery. It provides reliable pulling power and control in demanding situations.

Overview

Heavy-Duty Recovery Performance

The BHW12000 Motorcycle Recovery Winch System is engineered for demanding recovery and utility applications. Designed with a robust frame and high-tensile steel cable, this system provides reliable pulling power for motorcycles, ATVs, and similar vehicles in challenging environments. The kit includes essential components such as a solenoid pack, remote control, and hydraulic connectors to ensure a complete, ready-to-install solution for professional recovery needs.
