

Motorcycle Reflector Light Bulb

This reflector light bulb is designed to direct light in a specific direction. It features a standard screw base for easy installation in compatible fixtures.

Product Overview

High-Performance Reflector Bulb

This reflector light bulb is engineered to provide precise, directional illumination, making it an ideal choice for motorcycle spotlight and display lighting applications. Featuring a specialized reflective coating on its inner surface, the bulb maximizes light output and focuses the beam exactly where it is needed most. Its standard screw base design ensures compatibility with a wide range of existing fixtures, allowing for quick and hassle-free installation.

Technical Specifications

Bulb Type	Incandescent Reflector
Base Type	Standard Screw Base
Lighting Features	Focused Beam, Reflective Coating, Directional Illumination

Application

Common Applications

- Motorcycle Spotlights
- Recessed Lighting
- Display Lighting
