

Motorcycle Rivet Fastener

This metallic rivet is used in motorcycle construction and repair. It features a cylindrical body and a flared head for secure fastening.

Product Overview

High-Performance Motorcycle Rivet Fastener

This metallic rivet fastener is engineered for reliability in motorcycle construction and maintenance applications. Featuring a robust cylindrical body and a precision-engineered flared head, it provides a secure, permanent connection for critical components. Designed for durability, this fastener ensures structural integrity under the demanding conditions of motorcycle operation.

Technical Specifications

Material

Metal

Fastener Type

Rivet

Primary Application

Motorcycle Construction, Motorcycle Repair, Automotive Assembly

Design Features

Key Design Attributes

- Cylindrical body design
- Flared head for secure fastening
- High-strength metallic construction
