

Motorcycle Shock Absorber

These high-performance motorcycle shock absorbers are designed for optimal suspension and ride comfort. They feature durable construction, providing excellent damping and control for various riding conditions.

Overview

AX100 High-Performance Shock Absorber

The AX100 is a high-performance motorcycle shock absorber engineered to deliver optimal suspension and superior ride comfort. Designed with durable construction, this component provides excellent damping and control across a variety of challenging riding conditions. Its precise engineering ensures a perfect fitment for specific motorcycle applications, resulting in enhanced handling and stability for the rider.

Technical Specifications

Key Features

- Adjustable damping settings
- Heavy-duty spring construction
- Corrosion-resistant materials

Model Identifier	AX100
Application	Motorcycle, Suspension
